Kalabak Mh. Sk. 3300, No 10, Kat 3 Urla/İzmir

Dear Sir/Madam ,

Please accept this letter and the enclosed resume as my application for Configuration Management Engineer as advertised at Günsel.

As a recent undergraduate in Computer Science and graduate in Information Systems at Eastern Mediterranean University Cyprus, I am looking for a position in your firm. I am a fluent speaker, and I have a good knowledge of the language. I am also a good team player, and I am able to work well in a team. During my studies, I was able to learn a lot from the my teachers and my supervisors. Few months back i was an intern in Hard Sar enterprise, a well known frozen fish company in Ouagadougou Burkina Faso, I was position to manage and coordinate forty employees working on the company's three hundred trucks. Kept the inventory, receipts and daily data up-to date.

Apart feom that, I have good knowledge of different operating systems as well, such as software development tools, and networking (Cisco) and file systems as well as practical basic experience in these areas as well as frontend web development. During my cooperative education placements, I had self-study practical experience in developing and debugging codes; during my summer vacations, I kept myself busy by practicing and solving problems, my supervisor told me that I was an efficient student programmer he had in his class. When my classes required me to collaborate with other students on team projects, I was always asked by my peers to organize the work and present the results. In addition, I found that my problem-solving skills were enhanced by working as part of a team and by considering other people's ideas.

I am actively seeking the kind of challenge offered by working in your innovative firm and I am eager to learn more about your organization and the culture it firmly stood for.

I am looking forward to working in your organization and I hope to hear from you soon.

Please contact me at +9053-1013-8638 or harunbah93@gmail.com.

Thank you for your attention, and I look forward to hearing from you.

Sincerely Haruna Bah Jibril
